

Create your own digital and collaborative Supply Chain with KanbanBOX!

KanbanBOX is the web service suitable for collaborating with your whole Supply Chain in a simple and intuitive way. Thanks to the new management suite for each value creation company process, it is possible to manage Purchasing, Production, Logistics. Each information and physical flow is under control.

KanbanBOX is a portal integrated with the ERP through which it is possible to manage internal and suppliers' communication, material progress and the entire document lifecycle.

Through one sole board it is possible to manage:

The Purchasing Office/Information Flow

- to manage Purchase Requests (PR) and Requests for Quotation (RFQ)
- to monitor and measure suppliers' performances through statistics (vendor rating)

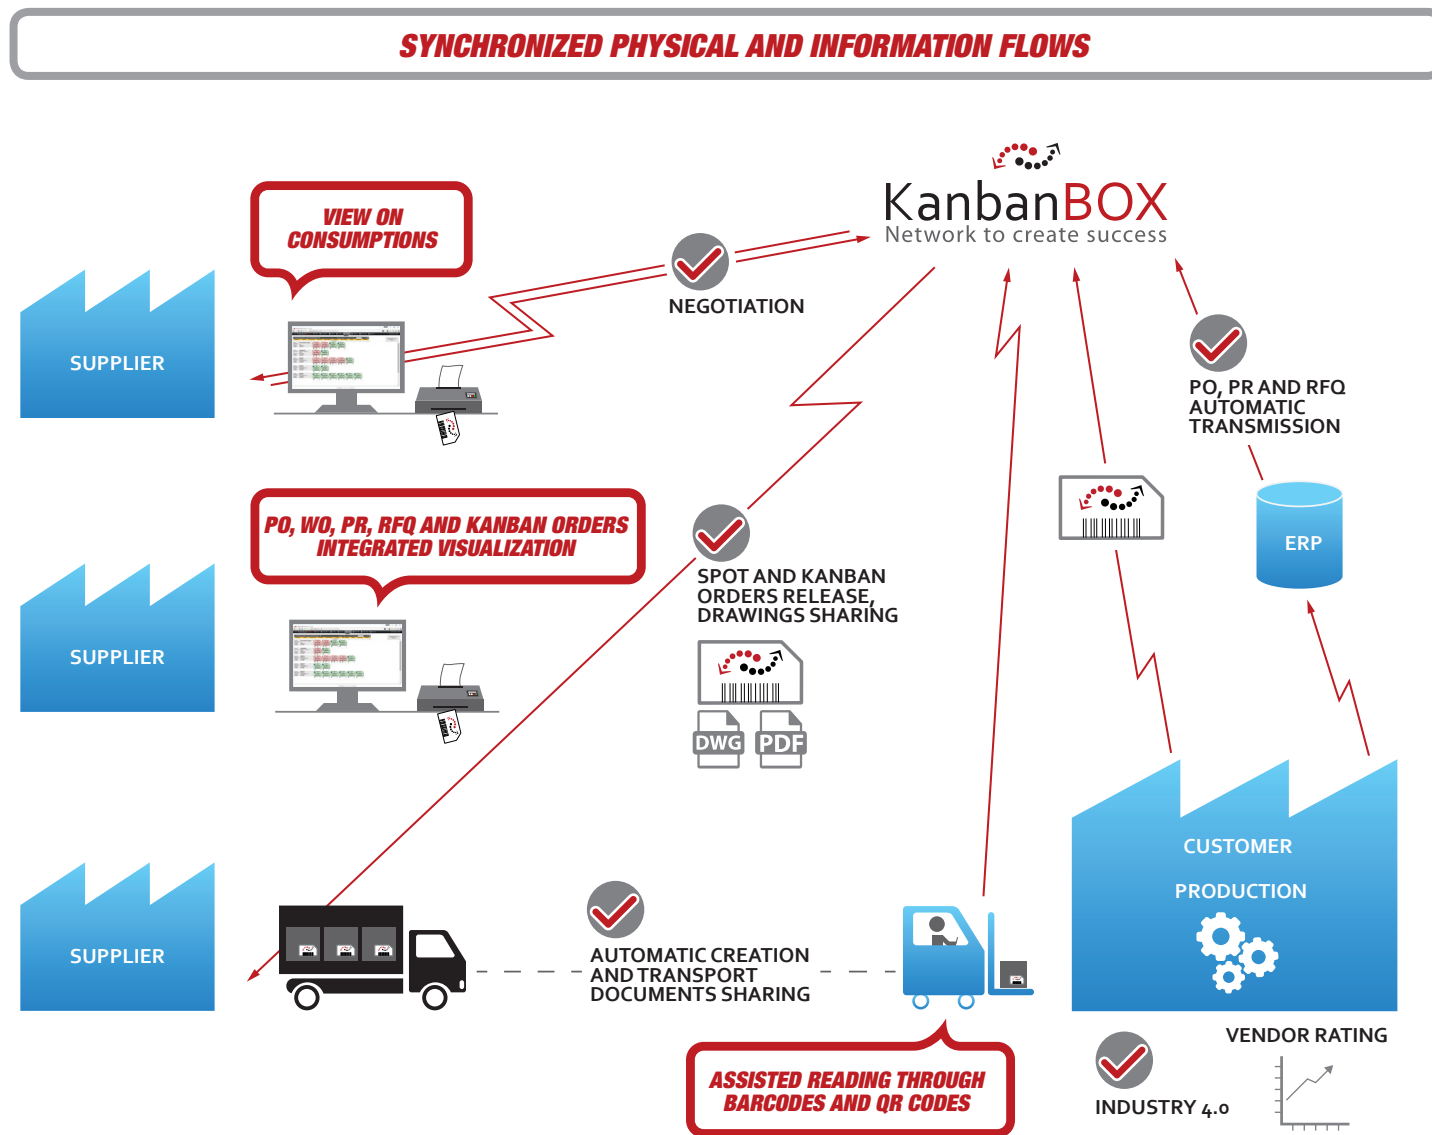

The Logistics Flow

- to release Kanban Orders and Closed Orders for Purchasing (PO) and Production (WO)
- to automatically create and share incoming and outgoing transport documents

The Material Flow

- to ease receiving and material check phases thanks to the barcode reading on the labels
- to attach documentation, technical drawings, qualitative and production standards
- to collect factory data, both automatically (Industry 4.0) and manually.
